

## Bandit Level 19 - Level 20

To gain access to the next level, have to use the `setuid` binary located in the home directory. A `setuid` binary is an executable that runs with the privileges of the file's owner and not the user who executes it. In this case we need `bandit20` permissions to locate and cat the password.

We can run normal commands as if we were `bandit20`, but adding `./bandit20` before every command.

```
bandit19@bandit:~$ ./bandit20-do ls /etc//bandit_pass/
bandit0  bandit11  bandit14  bandit17  bandit2  bandit22  bandit25
bandit28  bandit30  bandit33  bandit6  bandit9
bandit1  bandit12  bandit15  bandit18  bandit20  bandit23  bandit26
bandit29  bandit31  bandit4  bandit7
bandit10  bandit13  bandit16  bandit19  bandit21  bandit24  bandit27
bandit3  bandit32  bandit5  bandit8
bandit19@bandit:~$ ./bandit20-do cat /etc/bandit_pass/bandit20
0qXahG8Zj0VMN9Ghs7i0WsCfZyX0UbY0
```
