

# Bandit Level 4 - Level 5

SSH into level 4

```
ubuntu@ubuntu:~$ ssh bandit4@bandit.labs.overthewire.org -p 2220
```

Password: 2WmrDFRmJlq3lPxneAaMGhap0pFhF3NJ

First we need to move into the 'inhere' directory, then display the contents.

```
bandit4@bandit:~$ cd inhere/  
bandit4@bandit:~/inhere$ ls  
-file00  -file02  -file04  -file06  -file08  
-file01  -file03  -file05  -file07  -file09
```

One of these files is human readable and contains the password. We can cat every single and see which one contains the password or we can use the 'file' command to display the file type. We can also add a wildcard to the command so it will select all the files.

```
bandit4@bandit:~/inhere$ file ./-f*  
./-file00: data  
./-file01: data  
./-file02: data  
./-file03: data  
./-file04: data  
./-file05: data  
./-file06: data  
./-file07: ASCII text  
./-file08: data  
./-file09: data
```

File07 is in ASCII text and therefore most likely to contain the password.

```
bandit4@bandit:~/inhere$ cat ./-file07  
4oQYVPkxZ00E005pTW81FB8j8lxXGUQw
```

Proceed to level 5!
