

Bandit Level 1 to Level 2

Using the previous password to log onto level 1. The SSH would look like:

```
ssh bandit1@bandit.labs.overthewire.org -p 2220
```

Then enter the password from previous level:

ZjLjTmM6FvvyRnrb2rfNWOZOTa6ip5If

```
bandit1@bandit.labs.overthewire.org's password:
```

The goal is to open a file named '-'. They have used a dash for its name and it is located in the home directory.

To open dashed filenames, we need to use the relative path ./ or prepend the filename with a ./ which represents the current directory.

Lets confirm the file exist first.

```
bandit1@bandit:~$ ls
```

Response

```
-
```

(literally just a dash)

Use cat to display the contents along with the relative path

```
bandit1@bandit:~$ cat ./-*
```

Response

```
263JGJPfgU6LtdEvgfWU1XP5yac29mFx
```

Onwards and upwards to Level 2!
