

Bandit Level 17 - Level 18

There are two files located in the directory `passwords.new` and `passwords.old`. Only one line has been changed.

We can use the `diff` command to compare two different files. The '`<`' and '`>`' represent the change in which file. In this case the '`<`' represents the changes in the 'new' file while the '`>`' represents changes in the 'old' file.

```
bandit17@bandit:~$ diff passwords.new passwords.old
42c42
< x2gLTTjFwM0hQ8oWNbMN362QKxfRqGl0
---
> ktfgBvpMzWKR5ENj26IbLGSblgUG9CzB
```
