

Bandit Level 26 - Level 27

Lets check the contents of the home directory

```
bandit26@bandit:~$ ls
bandit27-do  text.txt
```

We have another setuid file that we can use to log into level 27. Using the bandit27-do setuid file to log into level 27, pass the cat command to it to print the bandit27 password located in the /etc/bandit_pass folder.

```
bandit26@bandit:~$ ./bandit27-do cat /etc/bandit_pass/bandit27
upsNCc7vzaRDx6oZC6GiR6ERwe1MowGB
```

Done! Move on to level 27 - level 28
